## Bar Stool Height & Sizing Advice:

Seat height for bar stools is measured from the ground to the top of the seat and there are 2 main standards.

650mm is suitable for seating at a kitchen worktop height.

750mm is more suitable to seating at a raised breakfast bar height.

## Clash Warning:

If you are choosing seating that includes arms or a sloping back, please take care when pushing these under counter tops, breakfast bars or tables as they may clash and over time cause damage and/or excessive wear. In particular this will be very prevalent with stone counter tops as these will tend to have a more textured underside.

## Colour Variation:

With natural wood finishes and some painted finishes, there will be a standard tolerance of slight difference between samples and actual finishes that will be deemed acceptable. If buying an additional piece to match with a previously purchased piece this variation may be more significant due to batch differences and external factors such as effect by UV.
